NEWS

DonbasEnergo, Ukraine's fifth-largest thermal power generation company, earned UAH 105mn (USD 12.8mn) in net profit in 1Q13 compared to a net loss of UAH 110mn in 1Q12, according to the company's financial report released on Wednesday (Apr 24). The company's revenue rose by 9.5% YoY to UAH 1.2bn (USD 146mn) in the period while gross profit was UAH 141mn (USD 17.3mn) compared to gross losses of UAH 69mn a year earlier.

COMMENTARY

The solid net profit in 1Q13 for DonbasEnergo was a surprise for us, as the company has historically posted losses in the period due to seasonal factors. In our view, there are two contributing explanations for the radical improvement in the financial results of the company in 1Q13. The first is cheaper coal amid a glut of supply that has existed in Ukraine since 1H12. The second reason is likely an attempt by the Energy Ministry to increase the profitability of DonbasEnergo ahead of its privatization planned later this year. According to the latest information from the State Property Fund, an announcement of a privatization auction to sell a 60.77% stake in DonbasEnergo could be made in June or July.
