Equity

Ukrainian stocks sharply underperformed global markets on Monday (Apr 14), as the weekend's armed takeovers of government buildings in several large provincial towns in Donetsk oblast by pro-Russian paramilitaries took its toll on the investment mood in Kyiv and raised serious doubts about the Ukrainian government's ability to exercise even a minimum of control over the situation. The UX index lost 3.8% to close at 1119 points, led by Donetsk-based Metinvest names Avdyivka Coke and Azovstal, which slumped by 10.1% and 7.2% respectively. DonbasEnergo and Alchevsk Steel, which are located in the same geographic region, lost about 6.5% each, with the former ending at UAH 42.90. Top liquid issues Motor Sich and UkrNafta shed 2.2% and 2.9% respectively on combined turnover of UAH 9.1mn. In London, Ferrexpo moved down by 1.9%, while Kernel sold off by 5.1% in Warsaw to end at PLN 29.70.

Fixed Income

Ukrainian sovereigns slid on Monday on intensified tensions in the eastern regions. Ukraine-23s dropped by 2.3p.p. to 86.0/91.3 (9.9%/8.9%). Corporate names also finished lower. Metinvest-15s and DTEK-18s declined by 2.2p.p. and 1.6p.p. closing at 94.5/96.5 (18.6%/15.9%) and 81.1/81.8 (14.3%/14.0%), respectively.

Merch Trade Deficit Contracts Sharply to USD 120mn in February

by Dmitriy Churin

NEWS

Ukraine's merchandise trade deficit fell by 7.3x YoY to USD 123mn in February, according to data from the State Statistics Committee. For 2M14, the deficit is down by 3.4x YoY to USD 270mn. Ukraine's exports fell by 10.0% YoY to USD 9.1bn while imports plunged by 17.9% YoY to USD 9.4bn in the period.

Source: State Statistics Committee

COMMENTARY

The slowdown in foreign trade observed in the first two months of the year had a mixed impact on the country's economy. On the one hand, lower imports helped to limit the current account deficit, while on the other, the data for January-February indicated a contraction in business activity and consumer confidence. The considerable decrease in imports was largely a result of the steep devaluation of the hryvnia, while we would attribute the export decline to the disruption of sales to Russia against the background of the Jan-Feb political unrest in Kyiv. Russia remains the most important export market for the Ukrainian machinery sector. In February alone, export of transportation equipment (including railcars) from Ukraine dropped by 45.5% YoY to just USD 172mn in estimated value terms. Meanwhile, the drop in steel products exports was 6.8% YoY to USD 1.37bn. On the import side, Ukraine decreased its natural import purchases from Russia by 54.8% YoY to USD 443mn in value terms in February.

IMC Raises Land Under Spring Cultivation by 18% YoY to 124,000 ha

by Ivan Dzvinka i.dzvinka@eavex.com.ua

NEWS

Central Ukraine-based, Warsaw-listed crop grower Industrial Milk Company (IMC) reported on Monday (Apr 14) that it will expand its land under cultivation with spring crops by 18% YoY to 124,000 ha. The company is set to increase its area planted with corn by 38% to 85,000 ha and with soybean by 85% YoY to 8,100 ha this season. Sunflower seeds will be planted on an area of 18,500 ha (-28% YoY) with land under fodder crops (12,000 ha, -3%) and potato (645 ha, -1%) remaining nearly unchanged.

COMMENTARY

The growth in area under spring crops is a result of a 13% rise in IMC's land bank to 136,700 ha as of early 2014 as well as an 18% drop in the area sown under winter crops to 8,500 ha. IMC is pursuing a strategy of beefing up the share of soybean in its crop mix due to lucrative pricing for that crop last season thanks to strong demand for this oilseed on Asian markets. Meanwhile, the lower area under sunflower seed is explained by the company's application of a rational crop rotation system because of sunflower's exhaustive effect on the land where it is planted.

Agroton Buys Back USD 22mn of Its Eurobonds

NEWS

Lugansk-based crop grower Agroton has bought back USD 22.1mn of its outstanding USD 50mn Eurobonds, the company reported in a filing on the Warsaw Stock Exchange on Monday (Apr 14). The conditions of the buyback were not disclosed.

COMMENTARY

As we presumed back in early January, parties related to Agroton had consolidated a substantial portion of the bonds, which enabled the group's main beneficiary Vitaliy Zhuravlev to push through a restructuring with detrimental conditions for other bondholders, including lowering the coupon to 6% (vs. 12.5% in the original issue) and postponing the maturity for 5 years until 2019. With the announced buyback amount constituting only 44% of the total issue, we suppose that there may be further buyback announcements (with the bonds in fact purchased from related parties) in the future. Due to the low level of corporate governance demonstrated here, as well as the location of the company's operations in the epicenter of Ukraine's political unrest in the east of the country, we are sticking with our recommendation to stay away from both the bonds and equity of Agroton.

Investing in emerging markets' securities may entail certain risks. There may be limited information available on such securities. Securities of emerging markets' companies may be less liquid and their prices more volatile than securities of comparable developed markets' companies. In addition, exchange rate movements may have an adverse effect on the value of an investment.

This document is based on data we deem to be reliable, though we do not guarantee its accuracy or completeness and make no warranties regarding results from its usage.
