Ukraine's FY14 Sugar Output Headed for 75% YoY Increase

by Ivan Dzvinka i.dzvinka@eavex.com.ua

NEWS

The most recent 2014 national sugar production data for Ukraine says that 1.92mn tonnes have been produced this year (as of Dec 11). The figure was reported by industry association UkrTsukor, and represents an increase of around 75% YoY from the same period of 2013.

COMMENTARY

With Ukrainian domestic annual consumption of sugar at 1.7mn tonnes and inventories of some 300,000 tonnes from the last season, Ukrainian sugar producers will have to try to export a substantial part of this year's output to prevent sugar prices in Ukraine from a decline due to demand/supply imbalance. UkrTsukor says it is working on setting up export deals to the Middle East and Africa, and also states that Ukraine's export quota to EU, which currently amounts to a negligible 20,000 tonnes, needs to be expanded. While this year's excess supply on the Ukrainian sugar market is a negative development for Astarta, the largest domestic refiner, we presume that the company is well-positioned to expand its export network, which would also bode well for its forex revenue stream in the current environment of hryvnia devaluation.

Investing in emerging markets' securities may entail certain risks. There may be limited information available on such securities. Securities of emerging markets' companies may be less liquid and their prices more volatile than securities of comparable developed markets' companies. In addition, exchange rate movements may have an adverse effect on the value of an investment.
