# Industrial Output Slide Reported at 13% YoY in July

by Dmitry Churin d.churin@eavex.com.ua

#### NEWS

Ukraine's year-on-year industrial production decline was 13.4% in July, representing the smallest drop so far in 2015 (-18.1% YoY in June), according to data from the State Statistics Committee released on Tuesday (Aug 18). The industrial production data excludes Crimea and the separatist-occupied part of the Donbass. In the extraction sector, output fell by 13.4% YoY in July, in the manufacturing sector the drop was 12.0% YoY, and in utilities production fell by 13.9% YoY in the period. Through the end of July, 2015's overall production as measured by the index was down 19.5% YoY. In July compared to June, output rose by 3.4% in line with the additional calendar day compared to June.

#### COMMENTARY

The relative improvement in the industrial decline is in line with the softening comparison base from 3Q14, which is when the heaviest phase of the Donbass conflict began. We continue to focus on coal production in the country, which is an important indication of whether there will be a shortage of coal in the winter season. The July data said that overall coal extraction in the month was 2.2mn tonnes (-42% YoY). In 7M15, coal output was 15.5mn tonnes (-53.2% YoY). This implies that monthly average coal production has started to increase; the government also recently said that it now has a deal to obtain coal from the Donbass war zone via Russian intermediaries. We estimate that the Energy Ministry will manage to increase total coal inventories at thermal power stations by 1.0mn tonnes before November.

We expect that the industrial production index will continue to improve on a YoY basis in the coming months, especially for August, which was a month of peak fighting in the Donbass last year.

#### NEWS

Kernel, Ukraine's largest sunflower oil producer, has renewed its USD 230mn credit line with a syndicate of European banks, the company's press service announced on Tuesday (Aug 18). The line, which is classified as a grain preexport facility, is used by the group to fund the working capital needs of its grain export business in Ukraine.

#### COMMENTARY

The ability of Kernel to renew such a large credit facility indicates European banks' view about the solidity of Kernel's business. To compare, the owner of UkrLandFarming, Ukraine's largest agricultural group in terms of land bank, recently admitted that ULF's credit limits this year were sharply reduced to USD 50-100mn, from USD 400-500mn previously.

As of Mar 31 this year, Kernel's total debt stood at USD 589mn, with net debt amounting to USD 476mn, implying a Net Debt/12M EBITDA ratio of 1.0x.

With no assets in the Donbass, Astarta's exposure to UAH devaluation is largely offset by its UAH cost base.         |

Investing in emerging markets' securities may entail certain risks. There may be limited information available on such securities. Securities of emerging markets' companies may be less liquid and their prices more volatile than securities of comparable developed markets' companies. In addition, exchange rate movements may have an adverse effect on the value of an investment.
