20% Haircut Deal Confirmed; Russia Won't Participate

by Will Ritter w.ritter@eavex.com.ua

NEWS

Ukraine's Finance Ministry on Thursday (Aug 27) confirmed rumors floated earlier this week that Kyiv and a major group of creditors led by US brokerage Franklin Templeton have agreed on a sovereign restructuring plan which reduces the country's outstanding Eurobond debt from USD 19bn to near USD 15bn. The deal involves a maturity extension of 4 years and a principal writedown of 20% face value on all of Ukraine's 14 outstanding traded Eurobond issues, which will be condensed into 9 new bonds. MinFin said the coupons on all the bonds will be changed to 7.75%. The deal still needs to receive the approval of Ukraine's Parliament and of 75% of bondholders at a special meeting; the Templeton creditor group owns slightly less than 50% of the total debt amount. Finance Minister Natalia Jaresko said Ukraine is asking the Russian government to accept the same terms on a USD 3bn nontraded Eurobond maturing in December of this year. However, her Russian counterpart Anton Siluanov was quoted as saying that Moscow will not participate in the agreed restructuring and expects the bond to be redeemed in full.

COMMENTARY

Ukrainian sovereigns saw a tremendous rally after the news broke yesterday, with the benchmark Ukraine-17 issue shooting up by some 15p.p. (28%) to near 70 cents on the dollar. This indicates how significantly international investors view this deal in terms of improving Ukraine's short and mediumterm economic prospects. The 20% principal write-down was the key sticking point, and it represents a compromise that allows both the government and the creditors to save face, as well as to meet the IMF's fiscal requirements. Still, some analysts have opined that the relatively moderate haircut as well as the maturity extension of only 4 years may not be sufficient to bring Ukrainian debt down to a sustainable level over the long term. In our view, however, short and medium-term considerations certainly trump the long term for Ukraine right now, and reaching an acceptable debt deal is paramount in moving forward with the country's tough reform agenda. We therefore take an optimistic view of the announced deal, assuming it is passed. We also think the issue of the Russian-owned USD 3bn bond is being overblown; the actual haircut amount on this bond would be only USD 600mn, and so the larger issue would be extending the maturity. We suppose that between now and the December maturity, some sort of political compromise will be brokered by the West with Russia in regard to this bond. Ukraine clearly has some legal leverage to demand state-to-state compensation following the seizure of Crimea by Moscow last year. With the debt question apparently near resolution, the remaining big issue for Kyiv is the development of the situation in the Donbass, given that political provisions of the Minsk ceasefire agreement on re-integrating the separatist republics into Ukraine are unlikely to be implemented.

EAVEX RECOMMENDATION	VS
----------------------	-----------

Name	Ticker	Price, per share	Target price, per share	Upside, %	Rating	Commentary
Agriculture						
Kernel	KER PW	39.0	56.50	45%	BUY	A hedged approach to doing business, no devaluation risk, limited political risk due to lack of assets in the Donbass, and a U-turn in the farming segment in the 2014-15 season make Kernel's stock our current top investment story.
МНР	MHPC LI	9.2	15.32	67%	BUY	MHP plans to increase its poultry output by 10% YoY to 600,000 tonnes in 2015, operating at full capacity use of its brand-new Vinnytsia complex. The group intends to expand its land bank in Ukraine to 500,000 ha in the medium term from the current 290,000 ha.
Astarta	AST PW	31.5	36.1	15%	HOLD	Astarta has made decisive moves toward diversification (it launched a soybean processing plant in early 2014) and cost optimization (launch of bioenergy complex in 2014). With no assets in the Donbass, Astarta's exposure to UAH devaluation is largely offset by its UAH cost base.
IMC	IMC PW	5.0	9.4	88%	BUY	Quality business & cheap stock are attributes which appropriately fits to the case of IMC. The company's work on deleverage, ongoing land bank expansion program, no exposure to Donbass and high standards of corporate governance more than offset poor liquidity of the IMC's stock.
AvangardCo	AVGR LI	0.7	1.4	96%	SELL	The loss of the company's output in the war-hit Donbass along with UAH devaluation will lead to even lower EBITDA in 2015 after a 57% plunge in 2014.
Ovostar Union	OVO PW	78.0	80.8	4%	HOLD	Ovostar has been one of the hardest-hit Ukrainian public companies by this year's UAH devaluation, as some 70% of its production cost is linked to USD while only 15% of its revenue is earned in hard currencies.
Iron Ore						
Ferrexpo	FXPO LN	58.5	48.0	-18%	SELL	The ongoing issue of global iron ore oversupply along with sluggish growth in demand will likely keep ore prices at depressed levels at least in the short run, boding poorly for Ferrexpo's earnings.
Steel						
Azovstal	AZST	0.79	0.56	-29%	SELL	Non-transparent reporting practices detrimentally affect Azovstal's reported earnings.
Coke Avdyivka Coke	AVDK	1.10	U/R	-	Susp.	Avdyivka Coke's facilities are located on the front line of the Donbass separatist-occupied territory, and the plant has been experiencing periodic artillery shelling since August 2014. However, the company continues to operate, albeit at reduced capacity.
Specialized Machinery						
Motor Sich	MSICH	2606	5250	101%	BUY	Motor Sich should see its revenue grow with a 2012-2016E CAGR of 9%, reaching USD 1.2bn. For 2012-2016, we forecast an average EBITDA margin of 35% and a net margin of 28%.
Oil & Gas						
Concern Galnaftogaz	GLNG	0.15	0.24	60%	BUY	Galnaftogaz is pursuing a plan to aggressively expand its filling station network.
Regal Petroleum	RPT	4.2	U/R	-	U/R	Regal has repeatedly missed its production targets since 2012.
JKX Oil & Gas	JKX	15.8	U/R	-	U/R	The launch of extraction at JKX's Russian gas field has lifted output, but the company's higher-margin Ukrainian operations continue to lag behind expectations.
Power Utilities						
DonbasEnergo	DOEN	19.3	U/R	-	U/R	The Donetsk separatist government has nationalized DonbasEnergo's Starobeshevo power plant, which previously accounted for about 70% of the company's installed power-generating capacity.
CenterEnergo	CEEN	7.30	15.00	106%	BUY	CentrEnergo's privatization has been postponed, but the company retains a strong fundamental value due to its large installed electricity generation capacity.
Banks						
Raiffeisen Bank Aval	BAVL	0.093	0.24	158%	BUY	Raiffeisen Aval has a conservative risk policy, and we therefore assume it will manage to weather the current banking crisis in Ukraine and start to generate profits starting from 2016. The EBRD is expected to purchase a stake in the institution.

Investing in emerging markets' securities may entail certain risks. There may be limited information available on such securities. Securities of emerging markets' companies may be less liquid and their prices more volatile than securities of comparable developed markets' companies. In addition, exchange rate movements may have an adverse effect on the value of an investment.

This document is based on data we deem to be reliable, though we do not guarantee its accuracy or completeness and make no warranties regarding results from its usage. Forecasts are estimates by specialists working for us, and actual events may turn out to be fundamentally different due to unforeseen circumstances.
