

## Stock Market Update

### Equity

Kyiv-listed stocks demonstrated their third straight week of growth as the country's latest economic data provided more reasons for investor optimism. Ukraine's retail sales continued to grow at a solid 6.2% pace in 1H18 and overall industrial output rose by 2.5%, while the machinery sector alone showed a firm 6.6% YoY output increase in the period.

The UX index added 1.9% to close at 1636 points. However, the trading activity was low amid the continued closure of the largest platform, which led to a wider bid/ask spread for most blue chip stocks. The spreads of around 5% somewhat distort the UX index's performance since the average spread midpoint is larger than the overall index gain. Raiffeisen Bank Aval (BAVL) advanced by 4.7% to 30.00 kopecks ahead of the bank's 2Q18 earnings report. We forecast that the bank will post 1.80 kopecks of net profit per share for April-June. UkrNafta (UNAF) corrected from its recent upward move, declining by 3.5% to UAH 110 per share. CentrEnergO (CEEN) barely reacted to the company's disappointing 2Q18 earnings of UAH 0.73 per share. The stock was little-changed at UAH 15.00. DonbasEnergO (DOEN) remained on a growth path climbing 3.4% to UAH 24.00. Earlier this month there was news that the company's majority stake of 60.8% was acquired by Maxim Yefimov, an MP from the Poroshenko Bloc. The price for the deal has not been disclosed.

In London trading, Ferrexpo (FXPO) was a bright spot for the second week in a row, surging 12% to GBp 194 per share after a solid advance of 8.8% over preceding week. The company is due to report its 1H18 financial results on Thursday (Aug 2). Poultry producer MHP (MHPC) slipped 2.7% to USD 12.50 per share. In Warsaw, Kernel (KER) failed to stay above PLN 50 level, dipping 1.2% to PLN 49.90. Astarta (AST) shed 2.1% to PLN 32.00 after the company unveiled a mixed operating report for 2Q18.

On the currency market, the hryvnia weakened notably by 1.0% against the dollar to end the week at 26.70 UAH/USD, as the traditional early autumn season of hryvnia devaluation appeared to get an early start. The National Bank was forced to intervene on the interbank market with forex sales from its reserves to maintain balance.

## NABU Accuses People's Front MP in Attack on its Office

by Will Ritter  
w.ritter@eavex.com.ua

### NEWS

A group of men broke into the office of the National Anti-Corruption Bureau (NABU) in Kyiv on Tuesday (Jul 17), smashing down doors and destroying a security camera, domestic media reported. NABU released a statement accusing People's Front MP Yevgeniy Deydey of being behind the incident. Deydey, a former fighter for Ukraine in the Donbass war, has been under investigation by NABU in an unlawful enrichment case for more than a year. In a related incident, anti-corruption activist Vitaliy Shabunin suffered minor injuries after being sprayed with green paint at a rally on the same day calling for the firing of Special Anti-Corruption Prosecutor (SAP) Nazar Kolodnytskiy due to the latter's refusal to pursue a corruption case against Oleksandr Avakov, the son of Interior Minister and People's Front leader Arseniy Avakov. The Kyiv Post newspaper reported that Deydey had made physical threats against one of its journalists for pursuing the NABU story.

### COMMENTARY

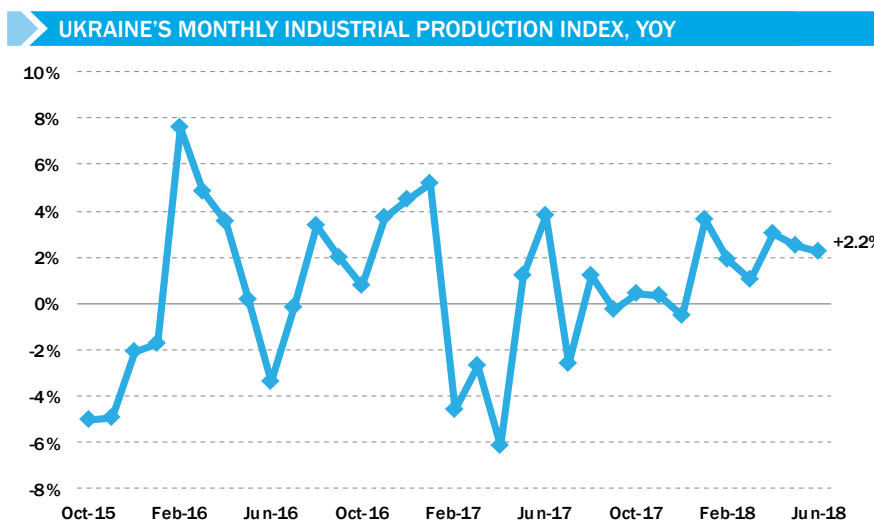

While NABU is supposed to be working closely with Kolodnytskiy to prosecute corruption cases, in fact the two agencies, NABU and SAP, have been at war with each other since at least last autumn. Most of the anti-corruption NGO community has sided with NABU, while those concerned with state stability have been more willing to cut Kolodnytskiy some slack. Still, in our view, after more than two years, it is clear that Kolodnytskiy has been unable to show any results in obtaining major convictions; in the most high-profile case, fired State Fiscal Service chief Roman Nasirov still has not been prosecuted despite being arrested in a NABU sting operation almost 18 months ago, and he had the gall to announce yesterday that he intends to run for Ukraine's presidency in next year's election. Despite placating the powerful Avakov faction, the writing seems to be on the wall for Kolodnytskiy after the US Embassy issued a statement calling for his ouster last week. However, the job of prosecuting politically powerful figures in Ukraine looks to be a nearly impossible one, and we are skeptical that any replacement for Kolodnytskiy will have much more success.

**Ukraine's 1H18 Industrial Output Rise Comes in at 2.5%**

by Dmitry Churin  
d.churin@eavex.com.ua

**NEWS**

Ukraine's nationwide industrial production rose by 2.5% YoY in the first half of 2018, with the increase for June alone at 2.2% YoY, according to data from the State Statistics Committee released last week. In the extraction sector, the output increase was 1.6% YoY in 1H18, and in the manufacturing sector it was +2.8% YoY, and in the utility sector it was +4.3% YoY.

Source: State Statistics Committee

**COMMENTARY**

The industrial production growth of 2.2% YoY in June, despite being marginally below average for the year thus far, is still on track to deliver our forecasted growth of 2.3% YoY for full-year 2018.

In particular sub-sectors, there was a strong 19.1% YoY output increase in auto machinery manufacturing in 1H18 and almost 40% YoY growth in chemical products output - which includes fertilizers - in the period. The worst performing sub-sector was electricity equipment machinery, which demonstrated an output contraction of 5.9% YoY in 1H18. Meanwhile, the overall machinery industry output index grew at a solid 6.6% pace YoY in January-June, partly due to additional military orders. Ukraine's defense budget was raised by 34% YoY to UAH 86bn (USD 3.2bn) for 2018. It is expected that military spending will be equivalent of 2.6% of Ukrainian GDP.

In other important macroeconomic data, UkrStat said the agricultural production index surged by 11.4% YoY in 1H18 (possibly due to a weather-related early start to the harvest season this year), the construction index advanced by 2.8% YoY, and retail sales rose by 6.2% YoY in the period.

## CentrEnergO Net Profit Drops 77% to UAH 271mn in 2Q18

by Dmitry Churin  
d.churin@eavex.com.ua

### CENTRENERGO (CEEN UK)

Price: UAH 15.00 Market Cap: USD 208mn

	P/B	EV/S	P/E	EV/EBITDA	Div. Yield
2017	0.8	0.4	2.9	1.6	25.6%
2018E	0.8	0.3	5.9	3.5	12.8%

## NEWS

CentrEnergO, Ukraine's second largest thermal electricity generation company by installed capacity, reported a 77% YoY drop in its net profit to UAH 271mn (USD 10.1mn) in 2Q18, according to the company's financials published on Jul 27. On the top line the company's net revenue rose by 33.5% YoY to UAH 3.83bn while EBITDA sank from UAH 1.53bn in 2Q17 to UAH 406mn in 2Q18. For the 1H18 period, CentrEnergO's net revenue grew by 32.2% YoY to UAH 7.97bn, EBITDA slumped 3.8x YoY to UAH 705mn, and net profit was UAH 439mn compared to net profit of UAH 2.02bn a year ago. On the balance sheet side, the company reported available cash of UAH 1.0bn (USD 37mn) and no interest bearing debt as of 30 June 2018.

### CENTRENERGO'S FINANCIAL RESULTS

UAH mn	2Q18	2Q17	1Q18	QoQ	YoY	1H18	1H17	YoY
Net revenue	3,828	2,867	4,146	-7.7%	33.5%	7,974	6,034	32.2%

Source: Company data,

## COMMENTARY

CentrEnergO's net profit for 1H18 implies earnings per share of UAH 1.19, which was sharply below our expectation of EPS of UAH 3.00 for the period. The company's elevated net profit last year was a result of special payments from the state electricity wholesale operator for so-called reserve capacity. This year CentrEnergO substantially raised electricity output, leading to lower payments for the reserve capacity. The company's output rose 57% YoY to 4.1 TWh in 1H18. Although it seems that it might be more profitable for the company to simply take the reserve capacity payment from the state instead of raising electricity production, the market regulator forbids such a practice. Therefore we now see that CentrEnergO's outstanding financial performance last year was a kind of an anomaly for the company. However, we do believe that CentrEnergO should consistently be able to operate with an EBITDA margin of 22-25% compared to the actual margin of 8.8% for 1H18.

With the appearance of the 1H18 financial report, we are revising our full-year forecast for CentrEnergO's net profit from UAH 5.20 per share down to UAH 2.70 per share. The company's P/E valuation multiple is now roughly 5.9x, which in our view is still attractive for the electricity generation sector. We confirm our BUY recommendation for the stock with a target price of UAH 25.60 per share, which implies 72% upside. The expected privatization of the government's three-quarters stake in CentrEnergO remains a major growth driver for the stock.

## EAVEX RECOMMENDATIONS

Name	Ticker	Price, per share	Target price, per share	Upside, %	Rating	Commentary
<b>Agriculture</b>						
Kernel	KER PW	49.9	82.0	64%	BUY	With on-demand borrowing access, Kernel is well placed to further consolidate its position in the oilseed crushing industry. The company reported that its sunflower oil sales in bulk rose by 29.4% YoY to some 508,000 tonnes in July-December 2017. The company aims to achieve EBITDA of USD 500mn by 2021.
MHP	MHPC LI	12.5	16.5	32%	BUY	MHP could start process of deleveraging which in turn would boost the company's MCap. Also the company has a declared strategy to expand its presence on the MENA and EU markets. MHP continued to increase its export sales. MHP also reported that its poultry exports rose 16% YoY to near 221,000 tonnes in 2017, accounting for 41% of total sales volume, up from a share of 36% a year before.
Astarta	AST PW	32.0	70.0	119%	BUY	Astarta is focused on business diversification and cost optimization via improving its energy and operational efficiency. We expect the company to increase sales by 12% in FY18.
Agroton	AGT PW	3.55	12.0	238%	BUY	Agroton unveiled a strategy to increase its land bank from 122,000 ha to 200,000 ha by mid-2019 securing additional lease rights and by acquiring companies that control land plots in Luhansk and Kharkiv region.
IMC	IMC PW	12.0	13.0	9%	HOLD	IMC's land bank is targeted to expand by 50% over 2015-20. A high standard of corporate governance makes the stock an attractive play in spite of its low liquidity.
AvangardCo	AVGR LI	0.3	0.3	-9%	SELL	AvangardCo's revenue fell by 33% YoY in FY17 despite an increase in egg sales volume by 23% YoY. We attribute this negative development to weak results in the value-added egg powder segment. AvangardCo said that its egg product sales volume had plunged by 64% YoY to some 3300 tonnes, with the average pricing dropping by 23% YoY to USD 4.30/kg.
Ovostar Union	OVO PW	98.0	110.0	12%	HOLD	The company has a strong focus on domestic branded egg sales and successfully expands its export sales to mitigate negative effect from devaluation. Ovostar is in the midst of a long-term expansion that will ultimately see egg output triple over 2012-18E.
<b>Iron Ore</b>						
Ferrexpo	FXPO LN	191	230	21%	BUY	Iron ore market has seen a major shift over the past two years as China's anti-pollution drive spurs demand for cleaner ore, exploding the spreads between top-quality material and lower-grade cargoes, which benefits Ferrexpo as top-quality pellets producer.
<b>Specialized Machinery</b>						
Motor Sich	MSICH	5390	6750	25%	BUY	Motor Sich is closing in on a solid contract with Chinese company Avicopter (AVIC) to supply helicopter engines for a Russian-Chinese project. Our base case scenario forecast for Motor Sich's net profit for FY18 is UAH 2.6bn, implying EPS of UAH 1,270.
<b>Oil &amp; Gas</b>						
UkrNafta	UNAF	108	270	150%	BUY	UkrNafta's fundamental value should see an immediate jump after the company reaches a deal with the government on restructuring its huge UAH 12bn tax debt. We believe that with the state owning a 50% stake in UkrNafta, the resolution of the tax debt issue is only a matter of time.
Concern Galnaftogaz	GLNG	0.27	0.33	22%	BUY	Galnaftogaz is pursuing a plan to aggressively expand its filling station network.
Regal Petroleum	RPT LN	18.0	30.0	67%	BUY	The RPT stock has been enjoying aggressive buying from an unidentified investor since the start of the year. From the chart point of view, the stock hit a local maximum of GBP 31, and we believe that this peak is likely to be repeated sometime before the end of 2018.
JKX Oil & Gas	JKX LN	30.0	33.0	10%	HOLD	The company's balance sheet looks healthy after it successfully restructured its Eurobonds. An overall demand for natural gas in Ukraine remains strong.
<b>Power Utilities</b>						
DonbasEnergO	DOEN	23.2	9.0	-61%	SELL	The Donetsk separatist government has nationalized DonbasEnergO's Starobeshevo power plant, which previously accounted for about 70% of the company's installed power-generating capacity.
CenterEnergO	CEEN	15.25	25.60	68%	BUY	CentrEnergO posted net profit of UAH 5.12 per share in FY17, and the company decided to distribute 75% of this profit in shareholder dividends. CentrEnergO's privatization has repeatedly been postponed, but the company retains a strong fundamental value due to its large installed electricity generation capacity.
<b>Banks</b>						
Raiffeisen Bank Aval	BAVL	0.297	0.47	59%	BUY	We forecast that Raiffeisen Aval will raise its net profit by 7.3% YoY to UAH 4.80bn in FY18, implying EPS of 7.81 kopecks. We also believe the bank will continue its practice of large dividend payouts, with the FY18 dividend possibly around 7.50 kopecks per share. Raiffeisen Aval, about 70% of which is held by Raiffeisen International, has been the most dividend-rich stock in the Ukrainian equity universe since 2016. The stock's dividend yield last year was 20% and this year it was around 22%. Raiffeisen Aval posted a net profit of UAH 4.47bn for full-year 2017 (USD 170mn at the average UAH/USD rate for the period), compared to UAH 3.82bn for full-year 2016 and a net loss of UAH 1.44bn in FY15.
