Stock Market Update

Equity

Most Ukrainian blue chips finished higher last week, helped by positive sentiments on global financial markets. Stocks were on the rise worldwide as worries over the lack of a resolution to the US-China trade fight were offset by an assurance by Federal Reserve Chairman Jerome Powell that the US central bank is ready to be flexible on interest rates.

In Ukraine related news, Defense Minister Stepan Poltorak claimed that NATO representatives have changed their positions on Ukraine's accession to the alliance, and noted comprehensive assistance received by Ukraine from the bloc. Poltorak said NATO is considering four countries as potential members: Macedonia, Bosnia, Georgia and Ukraine. In our view, this is simply political posturing by President Poroshenko's team ahead of the presidential election, and Ukraine has no chance to join NATO in the foreseeable future.

Kyiv-listed financial issue Raiffeisen Bank Aval (BAVL) remained on the growth path, adding 0.6% to 34.50 kopecks. In the utility sector, DonbasEnergo (DOEN) surprised with a 5.8% gain to UAH 32.65 per share. We assume that the stock was lifted by expectations that the company will pay a substantial dividend from FY18 profit. As we reported earlier, DonbasEnergo posted a net profit of UAH 540mn in 9M18, which translates into UAH 22.83 per share. CentrEnergo (CEEN) added 2.3% over the week to close at UAH 14.45.

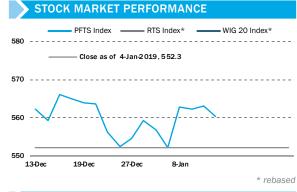

In London trading, Ferrexpo (FXPO) advanced by 1.5% to GBp 204 per share while Regal Petroleum (RPT) dropped by 14% to GBp 50.75 after a sharp rise over preceding week. In Warsaw, Kernel (KER) slipped 0.7% to PLN 49.00 per share; the stock has stayed very close to the PLN 50 level for the last several months.

On the currency front, the hryvnia fell 0.8% against the dollar to close at 28.03 UAH/USD. News that Ukraine's foreign currency reserves rose back above the USD 20bn level for the first time in 5 years appeared not to impact the market.

New Ukrainian Church Enjoys Smooth First Week of Existence

by Will Ritter w.ritter@eavex.com.ua

NEWS

The Ukrainian Orthodox Church (UOC), which officially came into existence on Jan 6 at a ceremony in Istanbul, saw its first week pass without major provocations. Russian President Putin as well as top officials in the Russian Orthodox Church had warned of violence in cases where parishes were forced to change their allegiance from Russian to Ukrainian. Interior Minister Arseniy Avakov stated in December that any groups trying to foment religious violence around the establishment of the new church would be dealt with harshly by the government.

COMMENTARY

Ever since the breakup of the Soviet Union in 1991, Moscow has maintained a de-facto territorial claim against Ukraine via its control of the latter's largest religious denomination. For this reason, it was extremely important for political reasons to establish a fully independent Ukrainian church, and the realization of this project represents a major victory for President Poroshenko ahead of his battle for re-election. The key region of the country for the new UOC is Central Ukraine, where a majority of parishes are likely to switch their allegiance from Moscow in the coming months. The loss of religious hegemony over Central Ukraine is particularly devastating to Russian imperialist ideology, as this ideology has always made a distinction between "Little Russia" (as Central Ukraine was known under the Tsarist regimes) and Western Ukraine, which was never considered part of Russia. In addition, unlike in southeastern Ukraine where Russian remains unchallenged as the dominant language almost 30 years after Ukrainian state independence, Central Ukraine has gradually seen Russian supplanted by Ukrainian over the past generation as the region's most widely spoken language. As we have noted before, the downside of the new Ukrainian church is that it could increase the cultural divide between Central Ukraine and the southeastern provinces, where most parishes will probably choose to remain with the Russian church. However, the main objective of creating the UOC was never to convert every church in the country to the national denomination, but simply to provide Ukrainians with the option of belonging to a fully-recognized church free of Russian influence and coercion.

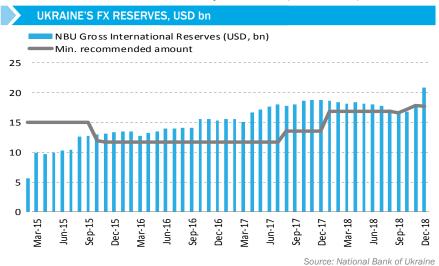

Ukraine to Lift Some Capital Controls as Forex Reserves Rise to 5-Year High of USD 20.8bn

by Dmitry Churin d.churin@eavex.com.ua

NEWS

Ukraine's foreign currency reserves rose by USD 3.09bn (+17.4%) to USD 20.8bn in December, the National Bank of Ukraine said on Jan 8, putting the reserves at their highest level since October 2013. The reserves ended 2018 with an expansion of 10.6% for the full year. The NBU said December's rise occurred thanks to the arrival of USD 2.39bn aid from international donors, including USD 1.4bn from the IMF. The reserves also increased due to government receipts worth USD 540mn from the placement of domestic USD-denominated bonds. Moreover, NBU interventions on the interbank market made a positive contribution, with the central bank's net forex purchases totaling USD 338mn last month. In terms of outflows, MinFin and the NBU transferred USD 158mn in payments to the IMF and spent USD 156mn to service government debt.

In November, the reserves had risen by 5.8% MoM (USD 974mn).

COMMENTARY

The December NBU report provides firm ground for optimism, as the reserves actually came reasonably close to reaching the government's wildly optimistic year-end target of USD 22bn, and the current level covers around 3.5 months of Ukraine's imports. As a result, the NBU has already announced that it intends to lift several administrative restrictions on the currency market, starting from Feb 7. In particular, the period for importexport settlements will be widened to 365 days (from 6 months), and small export-import transactions (value below UAH 150,000 or USD 5300) will be exempted from controls entirely. The NBU announced a goal to bring the Ukrainian financial system into a state of truly free capital movement in order to improve the country's investment climate. Ukraine has had an obligatory 50% sale requirement of hard currency export proceeds for businesses since early 2014. Overall, the NBU reported that the generally favorable situation on the currency markets in 2018 allowed the central bank to conduct a net purchase of USD 1.4bn over the year. Although the total outflow from the reserves for debt servicing was USD 8.1bn last year, it was fully compensated by proceeds of USD 6.1bn from new foreign currency borrowings and lowinterest financial aid of USD 2.4bn from major international donors - the IMF, the European Commission, and the World Bank. For 2019, however, we forecast that Ukraine's foreign reserves will fall back to USD 17.5bn due to this year's tough debt repayment schedule.

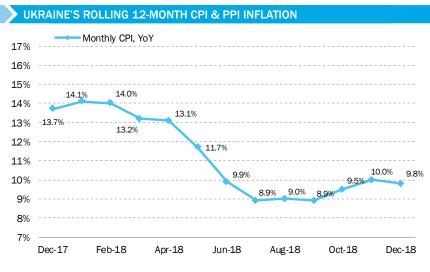

Ukraine Full-Year 2018 Inflation Comes In at 9.8%

by Dmitry Churin d.churin@eavex.com.ua

NEWS

Full-year 2018 consumer inflation in Ukraine was reported at 9.8%, which was in line with the National Bank's latest forecast, according to official data from the State Statistics Committee (UkrStat) published on Jan 9. For December alone, the reported CPI rise was 0.8% MoM.

Source: State Statistics Committee

COMMENTARY

The 9.8% full-year inflation figure comes in considerably below our own expectation of 12% inflation for the year. The December data was better than expected, as falling global oil prices helped to push down the transportation price category by 1.6% MoM, although on a yearly basis the category was nonetheless higher by 12.9%. Among other major CPI components, food category prices rose by 8.1% YoY in 2018, utility services prices were up by 10.6% YoY, and healthcare prices grew by 8.9%.

Currently the government sees CPI inflation at 7.4% for full-year 2019, which is below the IMF's forecast of 9.2% contained in the memorandum for the 14-month USD 3.9bn stand-by loan for the country. We are forecasting 9.7% inflation this year in the case of a basic scenario of overall macroeconomic stability.

The National Bank's key refinancing rate currently stands at 18.00%, representing a monetary policy that aims to reduce inflation and rebuild international reserves within a flexible exchange rate regime. The NBU's medium term goal is annual inflation of 5% in 2020-21. The next meeting of the NBU Board on monetary policy issues is scheduled for Jan 31. We believe that continued tight monetary policies and slowing domestic demand will help to bring inflation below 7% by end-2020, again under the base-case assumption that overall macro stability is maintained.

EAVEX RECOMMENDATIONS

EAVEX capital

Name	Ticker	Price, per share	Target price, per share	Upside, %	Rating	Commentary
Agriculture						
Kernel	KER PW	49.3	82.0	66%	BUY	With on-demand borrowing access, Kernel is well placed to further consolidate its position in the oilseed crushing industry. The company reported that its sunflower oil sales in bulk rose by 29.4% YoY to some 508,000 tonnes in July-December 2017. The company aims to achieve EBITDA of USD 500mn by 2021.
МНР	MHPC LI	10.1	16.5	63%	BUY	MHP could start process of deleveraging which in turn would boost the company's MCap. Also the company has a declared strategy to expand its presence on the MENA and EU markets. MHP continued to increase its export sales. MHP also reported that its poultry exports rose 16% YoY to near 221,000 tonnes in 2017, accounting for 41% of total sales volume, up from a share of 36% a year before.
Astarta	AST PW	24.4	70.0	187%	BUY	Astarta is focused on business diversification and cost optimization via improving its energy and operational efficiency. We expect the company to increase sales by 12% in FY18.
Agroton	AGT PW	4.05	12.0	196%	BUY	Agroton unveiled a strategy to increase its land bank from 122,000 ha to 200,000 ha by mid-2019 securing additional lease rights and by acquiring companies that control land plots in Luhansk and Kharkiv region.
IMC	IMC PW	13.5	13.0	-3%	HOLD	IMC's land bank is targeted to expand by 50% over 2015-20. A high standard of corporate governance makes the stock an attractive play in spite of its low liquidity.
AvangardCo	AVGR LI	0.3	0.3	7%	SELL	Avangardco's revenue fell by 33% YoY in FY17 despite an increase in egg sales volume by 23% YoY. We attribute this negative development to weak results in the value-added egg powder segment. Avangardco said that its egg product sales volume had plunged by 64% YoY to some 3300 tonnes, with the average pricing dropping by 23% YoY to USD 4.30/kg.
Ovostar Union	OVO PW	108.0	110.0	2%	HOLD	The company has a strong focus on domestic branded egg sales and successfully expands its export sales to mitigate negative effect from devaluation. Ovostar is in the midst of a long-term expansion that will ultimately see egg output triple over 2012-18E.
Iron Ore						
Ferrexpo	FXPO LN	201	230	14%	BUY	Iron ore market has seen a major shift over the past two years as China's anti-pollution drive spurs demand for cleaner ore, exploding the spreads between top-quality material and lower-grade cargoes, which benefits Ferrexpo as top-quality pellets producer.
Specialized Machinery						
Motor Sich	MSICH	5390	6750	25%	BUY	Motor Sich is closing in on a solid contract with Chinese company Avicopter (AVIC) to supply helicopter engines for a Russian-Chinese project. Our base case scenario forecast for Motor Sich's net profit for FY18 is UAH 2.6bn, implying EPS of UAH 1,270.
Oil & Gas						
UkrNafta	UNAF	129	270	109%	BUY	UkrNafta's fundamental value should see an immediate jump after the company reaches a deal with the government on restructuring its huge UAH 12bn tax debt. We believe that with the state owning a 50% stake in UkrNafta, the resolution of the tax debt issue is only a matter of time.
Concern Galnaftogaz	GLNG	0.27	0.33	22%	BUY	Galnaftogaz is pursuing a plan to aggressively expand its filling station network.
Regal Petroleum	RPT LN	50.5	30.0	-41%	BUY	The RPT stock has been enjoying aggressive buying from an unidentified investor since the start of the year. From the chart point of view, the stock hit a local maximum of GBp 31, and we believe that this peak is likely to be repeated sometime before the end of 2018.
JKX Oil & Gas	JKX LN	39.0	33.0	-15%	HOLD	The company's balance sheet looks healthy after it successfully restructured its Eurobonds. An overall demand for natural gas in Ukraine remains strong.
Power Utilities						
DonbasEnergo	DOEN	23.2	9.0	-61%	SELL	The Donetsk separatist government has nationalized DonbasEnergo's Starobeshevo power plant, which previously accounted for about 70% of the company's installed power-generating capacity.
CenterEnergo	CEEN	14.43	25.60	77%	BUY	CentrEnergo posted net profit of UAH 5.12 per share in FY17, and the company decided to distribute 75% of this profit in shareholder dividends. CentrEnergo's privatization has repeatedly been postponed, but the company retains a strong fundamental value due to its large installed electricity generation capacity.
Banks						
Raiffeisen Bank Aval	BAVL	0.386	0.47	22%	BUY	We forecast that Raiffeisen Aval will raise its net profit by 7.3% YoY to UAH 4.80bn in FY18, implying EPS of 7.81 kopecks. We also believe the bank will continue its practice of large dividend payouts, with the FY18 dividend possibly around 7.50 kopecks per share. Raiffeisen Aval, about 70% of which is held by Raiffeisen International, has been the most dividend-rich stock in the Ukrainian equity universe since 2016. The stock's dividend yield last year was 20% and this year it was around 22%. Raiffeisen Aval posted a net profit of UAH 4.47bn for full-year 2017 (USD 170mn at the average UAH/USD rate for the period), compared to UAH 3.82bn for full-year 2016 and a net loss of UAH 1.44bn in FY15.

Investing in emerging markets' securities may entail certain risks. There may be limited information available on such securities. Securities of emerging markets' companies may be less liquid and their prices more volatile than securities of comparable developed markets' companies. In addition, exchange rate movements may have an adverse effect on the value of an investment.

This document is based on data we deem to be reliable, though we do not guarantee its accuracy or completeness and make no warranties regarding results from its usage. Forecasts are estimates by specialists working for us, and actual events may turn out to be fundamentally different due to unforeseen circumstances. This document is provided for information purposes only.
