Stock Market Update

Equity

Kyiv-listed equities finished lower last week following a broad correction on the major global stock exchanges. The S&P500 index fell 2.5% and MSCI emerging market index was down by 6.4% over the week. The Ukrainian Exchange index (UX) corrected by 4.6%, ending at 1776 points.

The domestic news flow was dry and had no influence on local traders' sentiments. Raiffeisen Bank Aval (BAVL) lost 5.9% to 48.00 kopecks as the bank's valuation has reached a rather high level, with the P/B (Price to Book) ratio at 2.3x and P/E (Price to Earnings) hovering at 7.5x. Thermal generation company CentrEnergo (CEEN) dropped by 5.2% to UAH 8.25 per share as the country's electricity sector is suffering under systemic problems in the complex process of electricity pricing. The current crisis in the electricity market is a consequence of fundamental economic mistakes linked to arbitrary administrative interference in pricing. The industry has already accumulated a financial deficit of more than UAH 50bn (USD 1.8bn) since the launch of the new competitive market model in 2019 instead of the model based on a single wholesale operator. UkrNafta (UNAF) was also sharply lower, tumbling 9.1% to UAH 220.

In London trading, Ferrexpo (FXPO) dropped by 4.3% to GBp 335 and MHP (MHPC) edged down by 0.7% to USD 5.86.

Warsaw-listed Kernel (KER) slipped 0.5% to PLN 54.70, ignoring the company's strong earnings release for the Oct-Dec quarter, when the company saw its net profit jump by 3.2x to USD 128mn.

On the currency market, the hryvnia gave up 0.4% against the dollar over the week, closing at 27.98 UAH/USD.

Ukraine's January Industrial Output Down 4% YoY Amid Quarantine

by Dmitry Churin d.churin@eavex.com.ua

NEWS

Ukraine's industrial production dropped by 4.0% YoY in January after a rise of 5.0% YoY in December, the State Statistics Committee (UkrStat) reported last week. There was also a month-on-month unadjusted drop of 16.1% in January's industrial index as a result of the New Year holiday season. As has already been reported, Ukraine's overall industrial production for full-year 2020 showed a decrease of 5.2% after a decline of 1.8% in 2019 and a moderate increase of 1.1% seen back in 2018.

Source: State Statistics Committee

COMMENTARY

We are assuming that the IP index drop in January was anomalous and not the sign of a new negative trend, as the holiday-period decline last month was compounded by strict anti-COVID quarantine measures for more than half the month. There was a clearly mixed picture in major sectors. The metallurgical sector showed a 3.9% YoY decline in January while the chemical industry had a surprising rise of 10% YoY. The aggregate decline in the extraction sphere was 3.0%, whereas utility sector production grew by 3.2% YoY due to colder weather conditions compared to the winter of last year. For February, we expect a return to positive industrial growth, although it should be noted that UkrStat's headline IP index figure will be distorted to the downside by 3%, as the agency historically has not corrected for the leap year day difference.

In other key economic statistics, UkrStat reported that retail sales volume increased by 3.5% YoY in January, indicating rather surprisingly that the COVID quarantine lockdown had only a marginally negative effect on the retail figures. The agro sector's output index was down by 5.7% YoY in the first month of the year.

Kernel Boosts EBITDA 2.5x YoY to USD 269mn in Oct-Dec Quarter

NEWS

Kyiv-based, Warsaw-listed Kernel Holding, Ukraine's largest sunflower oil producer, boosted its EBITDA by 2.5x YoY to USD 269mn in the 2Q21 Oct-Dec quarter (the company's financial year runs from July to June). According to the company's consolidated financial statement published on Feb 26, net revenue rose by 29% YoY to USD 1.33bn in the period and net profit soared by 3.2x YoY to USD 128mn. For the 6 months ending in December, Kernel had revenue of USD 2.27bn (+20% YoY), EBITDA of USD 559mn (+2.6x YoY), and net profit of USD 332mn (+3.3x YoY).

On the balance sheet side, Kernel's net debt amounted to USD 1.25bn as of 31 December 2020, implying a Net Debt/EBITDA ratio of 1.6x. However, Kernel claimed that its "adjusted" net debt, which took into account readily-marketable inventories, was at 0.5x.

COMMENTARY

Kernel's reported net profit of USD 128mn for the Oct-Dec quarter exceeded our forecast of profit of USD 80mn for the period. We see that the company was able to improve its profitability significantly with an EBITDA margin widening by 9.7 p.p. to 20.3% for the quarter and the net margin increasing by 5.7 p.p. to 9.6%. For the half year, the net margin was higher at 14.6%, as historically the Oct-Dec quarter has been quite weak for Kernel in terms of financial results.

The KER stock, which has advanced by 11% since the start of the year, traded at PLN 54.70 on Friday. We estimate the stock's forward-looking P/E at 3.2x for FY21. Eavex Capital has a BUY recommendation for Kernel with a target price of PLN 65.00 per share. The company's Eurobonds with maturity in 2022 are quoted at 105.1 (3.1% YtM), while the Kernel-27s issue is valued at 108.0 (5.4% YtM).

| Name | Ticker | Price, per share | Target price, per share | Upside, % | Rating | Commentary |
| Agriculture | | | | | | |
| Kernel | KER PW | 54.7 | 65.0 | 19% | BUY | The company claimed that it enjoyed a high capacity utilization of its grain export value chain and healthy infrastructure business margin. We maintain our BUY recommendation for Kernel with a targ price of PLN 65.00 per share based on the group's expanded business operations, which have yet be reflected in the share price. Kernel's net profit for the Jul-Sept quarter was absolutely massive and implies earnings per share of PLN 9.1, translating at the PLN/USD exchange rate. The strong 1Q21 earnings report prompts us to revise our full-year 2021 forecast for Kernel's profitability. Previously we conservatively forecasted that the company's net profit would rise by 15% YoY to USD 136mn, while we now believe that Kernel could generate USD 350mn (+3.0x YoY) in net profit in FY21. |
| МНР | MHPC LI | 5.9 | 11.5 | 96% | BUY | Although MHP's business has not not suffered much from the COVID-19 crisis, the MHPC stock has tumbled by near 30% in 2020 as investors fear that the company's quite large debt burden could become unsustainable at some point. MHP's total debt was USD 1.47bn as of 30 Sept 2020. The Net Debt/EBITDA ratio was 3.3x as of 30 Sept 2020. up from 3.0x as of 1 Jan 2020. The company reported revenue of USD 1.41bn (-6% YoY), EBITDA of USD 332mn (-7% YoY), and a net loss of USD 109mn in 9M20. Meanwhile, MHP's net profit before the FX loss was USD 81mn in 9M20. |
| Astarta | AST PW | 46.5 | | | U/R | The AST stock surged after the company managed to improve its debt to EBITDA ratio. Net Debt reduced to EUR 175mn corresponding to Net debt/EBITDA (LTM) of 1.6x at the end of 9M20. Back in 2019 Astarta's Net debt/EBITDA topped an unsustainable level of 5.6x. |
| Agroton | AGT PW | 7.10 | 12.0 | 69% | BUY | Agroton unveiled a strategy to increase its land bank from 119,000 ha to 200,000 ha by mid-202 securing additional lease rights and by acquiring companies that control land plots in Luhansk an Kharkiv region. Agroton reported that its net profit was USD 5.2mn (PLN 0.96 per share) in 2019. In our view, Agroto currently has a fairly healthy financial position, with an estimated net cash position of USD 11.8mn. The company continues to invest in growth, spending USD 6.3mn on CapEx in FY19. |

Persisting uncertainty about whether CentrEnergo can really be privatized at a fair price has made the company a hostage of Ukrainian behind-the-scenes politics. Currently CentrEnergo is in a process to be integrated with the state coal mines to get cheaper fuel for its power stations. The integration is set to be completed in 2H21. |
| Banks | | | | | | |
| Raiffeisen Bank Aval | BAVL | 0.480 | 0.33 | -31% | SELL | Raiffeisen Bank Aval, the Ukrainian subsidiary of Vienna-based Raiffeisen International, earned UAH 4.7bn in net profit in FY19, which implied earnings per share of 7.72 kopecks. Raiffeisen Aval has been the most dividend-rich stock in the Ukrainian equity universe since 2016. The stock's dividend yield in 2017 was 20% and in 2018 it was around 22%. The bank paid 6.95 kopecks in dividend per share from FY19 net profit. The BAVL stock remains the highest dividend case in Ukraine's equity universe, and we do expect that the bank will distribute a 5.96 kopecks per share payout from its FY2 net profit. |

Investing in emerging markets' securities may entail certain risks. There may be limited information available on such securities. Securities of emerging markets' companies may be less liquid and their prices more volatile than securities of comparable developed markets' companies. In addition, exchange rate movements may have an adverse effect on the value of an investment.

This document is based on data we deem to be reliable, though we do not guarantee its accuracy or completeness and make no warranties regarding results from its usage. Forecasts are estimates by specialists working for us, and actual events may turn out to be fundamentally different due to unforeseen circumstances.
